

Shuai (S. A.) Yuan

Ph.D. Candidate (Expected graduation date: Jun 2024)

Zhejiang University, Hangzhou, China

Website: <https://shuai-yuan-1997.github.io>

E-mail: shuaiyuan1997@zju.edu.cn

Tel: (+86) 15850653800

EDUCATION

Zhejiang University (ZJU),

Hangzhou, China

Ph. D. candidate, supervised by Prof. Wei E. I. Sha (<http://www.zjuisee.zju.edu.cn/weisha/>)

Sep 2019 - Present

University of Trento (UniTN),

Trento, Italy

Visiting Ph. D. student, supervised by Prof. Andrea Massa

Mar 2023 - Mar 2024

Institut supérieur d'électronique de Paris (ISEP),

Paris, France

Visiting undergraduate student, project supervised by Prof. Maria Trocan

Sep 2017 - Feb 2018

Nanjing University of Aeronautics and Astronautics (NUAA),

Nanjing, China

B. E. in electronic science and technology, GPA top 10%

Sep 2015 - Jul 2019

INTERESTS

My research interests are in electromagnetic information theory and relevant wave engineering designs. Specifically, I am interested in the electromagnetic analytical and numerical methods that benefit the modeling of wireless communications. Additionally, I am keen on exploring novel hardware designs by leveraging the physical insights of communication systems. In the context of emerging scenarios and applications in 6G communications, it is essential to clarify the electromagnetic implications of information and model systems from an electromagnetic perspective. Addressing these new challenges often requires combining multiple research areas, including wave physics, antenna design, channel modeling, circuit design, etc. I have worked on several relevant projects, some of the codes can be found on my GitHub page: <https://github.com/Shuai-Yuan-1997>.

RESEARCH EXPERIENCE

• Electromagnetic information theory

Using computational electromagnetic methods for the modeling and characterization of wireless communication systems, including the free-space dyadic Green's function for near-field communications [2], volume integral equation method for inhomogeneous environments [4] and programmable electromagnetic environments [ongoing], T-matrix method for communication environments with multiple compact scatterers [6], angular spectrum analysis for deducing the degree-of-freedom limit of MIMO systems [3].

• MIMO performance characterization of antenna arrays

Characterizing the MIMO performance (i.e., capacity, degree of freedom) of antenna arrays based on channel models in different environments, including the Clarke and Kronecker models for Rayleigh channel [1, 11], the 3GPP models (QuaDRiGa) for spatial correlation channels [1]. For 6G communications, it is necessary to simultaneously consider the antenna radiation pattern, antenna efficiency, scattering environment (especially angular spread), beamforming/precoding methods for the evaluation and design of MIMO antenna arrays.

• Design and optimization of antennas/metasurfaces

Designing and optimizing the antennas/metasurfaces for different applications, including the design of a Pancharatnam-Berry metasurface for optimal OAM multiplexing [3], the design of a miniaturized frequency-selective surface absorber based on 2.5-D knitted structure [7], design of an EBG based 3-D antenna array for breaking the degree-of-freedom limit of MIMO systems built with planar array [1]. Familiar with the relevant numerical methods, full-wave simulations, fabrications and measurements.

SKILLS

- **Software:** CST, CST-MATLAB/Python Co-simulation, HFSS, COMSOL, QuaDRiGa (3GPP Simulation)
- **Experiments:** Microwave measurements of antennas and metasurfaces in anechoic chamber
- **Programming:** MATLAB, Python, C
- **Languages:** English (Fluent), Mandarin (Native), IELTS 7.0 (R8.5/L7.5/W5.5/S7.0), GRE V:149 Q:167AW: 3.0

TEACHING

Teaching Assistant: Lecture on Fundamental of Optoelectronics (in English)

Undergraduate level course on Electromagnetics, Wave Physics, and Optics

Zhejiang University

Mar - June, 2020-2023

SERVICES

- Reviewer for *IEEE Trans. Antennas Propag.*, *IEEE Antennas Wirel. Propag. Lett.*, *IEEE Antennas Propag. Mag.*, *Signal Processing*
- Secretary of *IEEE Nanjing Section Zhejiang Chapter*
